This presentation includes certain statements that constitute “forward-looking statements”, and “forward-looking information” within the meaning of applicable Canadian and United States securities laws (“forward-looking statements” and “forward-looking information” are collectively referred to as “forward-looking statements”, unless otherwise noted). All statements, other than statements of historical fact, may be forward-looking statements. Forward-looking statements are often, but not always, identified by the use of words such as “believe”, “anticipate”, “estimate”, “project”, “intend”, “expect”, “may”, “will”, “plan”, “should”, “would”, “contemplate”, “possible”, “attempts”, “seeks”, “goals”, “targets” and similar expressions. These forward-looking statements appear in a number of places and include statements regarding our intent, or the beliefs or current expectations of our officers and directors. Forward-looking statements may relate to the Company’s future outlook and anticipated events or results and may include statements regarding the White Gold properties mentioned herein, including, but not limited to, exploration and development plans with respect thereto and exercise of the Option, other exploration and development activities, the Company’s future financial position, business strategy, budgets, litigation, projected costs, financial results, taxes, plans and objectives. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends affecting the financial condition of our business.

Forward-looking statements are based on certain estimates, expectations, analysis and opinions that management believed reasonable at the time they were made or in certain cases, on third party expert opinions. These forward-looking statements were derived utilizing numerous assumptions regarding expected growth, results of operations, performance and business prospects and opportunities, general business and economic conditions, interest rates, the supply and demand for, deliveries of, and the level and volatility of prices of gold and related products, regulatory and governmental approvals, market competition, accuracy of mineral resource and mineral reserve estimates and geological, operational and price assumptions on which such estimates are based, conditions in financial markets, future financial performance of the Company, our ability to attract and retain skilled staff, our ability to procure equipment and supplies and results of exploration and development activities. While the Company considers these assumptions to be reasonable, based on information currently available, they may prove to be incorrect. Accordingly, you are cautioned not to put undue reliance on these forward-looking statements. Forward-looking statements should not be read as a guarantee of future performance or results. To the extent any forward-looking statements constitute future-oriented financial information or financial outlooks, as those terms are defined under applicable Canadian securities laws, such statements are being provided to describe the current anticipated financial condition and results of operations of the Company and readers are cautioned that these statements may not be appropriate for any other purpose, including investment decisions.

Such forward-looking statements involve known and unknown risks and uncertainties and other factors that may cause our actual events, results, performance or achievements to be materially different from any future events, results, performance or achievements expressed or implied by such forward-looking statements. Risks and uncertainties that may cause actual events, results, performance or achievements to vary materially include, but are not limited to, risks inherent to mineral exploration and development activities, changes in gold prices, changes in interest and currency exchange rates, inaccurate geological and metallurgical assumptions, unanticipated operational difficulties, government action or delays in the receipt of government approvals, adverse weather conditions, unanticipated events related to health, safety and environmental matters, labor disputes, political risk, social unrest, failure of counterparties to perform their contractual obligations, changes or further deterioration in general economic conditions, and other risks discussed in under the heading “Risks and Uncertainties” in the Company’s most recently filed MD&A.

Forward-looking statements speak only as of the date those statements are made. Except as required by applicable law, we assume no obligation to update or to publicly announce the results of any change to any forward-looking statement contained to reflect actual results, future events or developments, changes in assumptions or changes in other factors affecting the forward-looking statements. If we update any one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements. You should not place undue importance or reliance on forward-looking statements. All forward-looking statements contained in this presentation are expressly qualified in their entirety by this cautionary statement.”
THE OPPORTUNITY
World Class Team, Region, & Portfolio

Team
Experienced team collectively involved in every major gold discovery in the White Gold district.

Partners
Financial backing and technical expertise from Agnico Eagle and Kinross.
Strong capital markets relationships.

Land Package
Large, highly prospective land package.
Two existing high-grade deposits.
Located in a favorable mining jurisdiction.
Adjacent to other recently discovered gold deposits, including Coffee (acquired by Goldcorp for $520M).

Value
Attractive market capitalization.
Two defined high-grade gold resources.
Exposure to regional portfolio and strong exploration pipeline.
▪ Over 50,000 claims were staked in the region since 2007

▪ Entrance of major mining companies to the Yukon

▪ $360M Yukon Resource Gateway Project announced by Federal Government, upgrading over 650km of roads including four separate public road systems in the White Gold District, and building or replacing numerous bridges, culverts, & stream crossings.

▪ Strong take-out valuations on a per-ounce basis in the district:
  ▪ Kaminak - $175/oz (Purchased by Goldcorp, 2016)
Company timeline highlights:

Following a downturn in the mining sector, Shawn Ryan’s portfolio of properties were returned from option along with years of exploration data.

October 2016: Ryan partnered with White Gold Corp. to systematically explore the entire land package using his cutting-edge exploration techniques.

December 2016: Agnico Eagle invests $14.5M for a 19.9% stake in White Gold.

May 2017: White Gold Corp. acquires Kinross’ Yukon portfolio in exchange for 19.9% ownership.

September 2017: Federal and Territorial governments announce approval of the $360M Yukon Resource Gateway Project, upgrading over 650km of road, bridges, and stream crossings, including four separate public road systems in the White Gold District.

2018: White Gold Corp. expands footprint of known resources, makes multiple new discoveries, and acquires VG Deposit from Comstock Metals.

Executive team:

Shawn Ryan
Chief Technical Advisor

Robert Carpenter,
Ph.D., P. Geo
Director

David D’Onofrio, CPA
Chief Executive Officer

Jodie Gibson, P. Geo
VP Exploration

Famed prospector with multiple major gold discoveries in the Yukon totalling 7.5M oz. Pioneer of innovative exploration techniques.

Founder and CEO of Kaminak Gold Corporation, acquired by Goldcorp Inc. for $520M in 2016.

Extensive experience financing and advising resource companies globally. Deep capital markets expertise with a track record of success.

Project manager overseeing discovery drill holes on the White Gold project with Underworld prior to takeover by Kinross and on the QV project with Comstock Metals.
Largest Landholder in the District

2019 Exploration Program Highlights:

Currently planned program:

- **$13M Fully Funded Program**
- **17,000m - Diamond Drilling**
- **75 Holes - RC/RAB Drilling**
- **Multiple Advanced Targets**
- **Additional Regional Exploration Activity**
Public Float (Includes Several Strategic Institutional Shareholders)

Management & Insiders

Shares Outstanding: 111.8M | Warrants: 13.6M | Options: 5.6M

| Analyst Coverage |
|------------------|----------------|
| Firm             | Recommendation |
| GMP Securities — Steven Butler | Buy: $2.00 |
| Clarus Securities — Jamie Spratt | Watchlist |
| Canaccord Genuity | Watchlist |
Details:
- First discovery in the White Gold District
- Located 95km south of Dawson City, Yukon
- Airstrip, barge access, and a fully operational 100-person camp
- Aggressive program underway to expand established resource and test new targets

June 2019 GS & Arc Resource Highlights:
- Based on 2018 exploration.
- 1,039,600 oz Au Indicated at a grade of 2.26 g/t Au and 508,700 oz Au Inferred at a grade of 1.48 g/t Au.
- High-grade core with 832,000 oz Au Indicated at a grade of 2.96 g/t Au and 107,000 oz Au Inferred at a grade of 3.18 g/t Au.
- Mineralization known to extend beyond the limits of the current resource.
Details:

- Acquired from Comstock Metals in 2019.
- Contiguous to White Gold Property, hosting Golden Saddle & Arc deposits.
- High similarities in structural setting and mineralization style between VG and Golden Saddle deposits and Vertigo target.
- Existing high priority targets and remainder of QV property highly underexplored.

VG Historic Resource Highlights*:

- 230k oz of gold Inferred at a cut-off of 0.5 g/t gold (4.4 million tonnes grading 1.65 g/t gold).
- Mineralization known to extend beyond the limits of the current resource.
- Mineralization hosted along a NE trending, gently south dipping structural zone that has been traced for over 700m at surface.

*For more information, see Comstock Metals Ltd. Technical report titled “NI 43-101 TECHNICAL REPORT on the QV PROJECT”, dated August 19, 2014, available on SEDAR.
NEW DISCOVERY: VERTIGO
Multiple High-Grade Gold Zones 20 km North of Golden Saddle

- Located on the JP Ross property, road accessible from Dawson City.
- Drill intercepts of up to 103.9 g/t Au, and grab samples up to 304.3 g/t Au, amongst the highest grades ever encountered in the White Gold district.
- At least 12 individual mineralized structures have been identified over a 1,500m x 650m area, with 14 known target areas.
- Drill testing to date has validated mineralization over 500m of strike length which is open along strike and at depth, along a 12km mineralized trend.

NEW DISCOVERY: GS WEST
Near Surface Gold Discovery 750 m west of Golden Saddle

- Located on the White Gold property, 750 m west of the Golden Saddle deposit.
- Shallow zone of gold mineralization open at depth and along strike on a structural trend containing several other targets. Golden Saddle style mineralization in all three drill holes to date.

*Hole ended in mineralization
- Hayes Property (Coffee Trend East Area): Three new Au-As soil anomalies along the eastern projection of the Coffee Creek Fault exhibiting similar mineralization to the Coffee deposit with values ranging from trace to 330 ppb Au.

- Wolf Property (Coffee Trend West Area): A GT Probe line encountered consistent gold mineralization in 20 consecutive samples spaced 5m apart extending 95m with samples ranged from 94 ppb Au to 1,224 ppb.

- Pedlar Property (White-Stewart Area): Potential Cu-Mo±Au porphyry system located 27km from Western Copper and Gold Corp.’s Casino Project.

- Carlisle Property (Coffee Trend West Area): Directly adjacent to Goldcorp Inc.’s Coffee Project, with similar mineralization style and soil assays ranging from trace to 285 ppb Au.

- Nolan Property (Sixty Mile Area): At least seven new gold-in-soil trends with soil values ranging from trace to 539 ppb Au.

- Pilot Property (Beaver Creek Area): Three new soil anomalies ranging from trace to 468 ppb Au associated with arsenic, each tracing over 1.5km in length.
Notes on Resource Estimate:

(1) Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability.

(2) The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, socio-political, marketing, or other relevant issues.

(3) The Inferred Mineral Resource in this estimate has a lower level of confidence than that applied to an Indicated Mineral Resource and must not be converted to a Mineral Reserve. It is reasonably expected that the majority of the Inferred Mineral Resource could be upgraded to an Indicated Mineral Resource with continued exploration.

(4) The Mineral Resources in this report were estimated using the CIM Standards on Mineral Resources and Reserves, Definitions and Guidelines prepared by the CIM Standing Committee on Reserve Definitions and adopted by the CIM Council.

(5) Indicated and Inferred ounces were determined using the following assumptions: gold price of US$1,400/oz, average gold recovery of 94% on the Golden Saddle and 85% on the Arc (based on preliminary metallurgical test work), pit slope of 50 degrees, mining cost of CAN$2.50/tonne mined, processing costs of CAN$15.00/tonne milled, G&A costs of CAN$5.00/tonne milled, transportation and royalty costs of CAN$46.15/oz, and a US:CAN exchange rate of 0.77. These assumptions are subject to the completion of a detailed economic analysis and are not to be interpreted as such.
